

Standard Warranty Terms

Warranty: American Stainless Pumps (The Company) warrants that its manufactured products are made of first class materials and in a skillful and workmanlike manner, and when properly installed and maintained, will operate as proposed in the Company's written documents. This warranty is in effect for two years from the date of shipment.

The Company will pass through to its customers any warranties granted by the manufacturers of products purchased by the Company and sold with its manufactured products (such as motors or mechanical seals), but does not itself warrant these items.

There are no other warranties, express or implied, except for those warranties given here. The Company does not warrant against corrosion or erosion of its products when placed in service. Under no circumstances will the Company be liable for any penalties or any consequential or incidental damages caused by the failure of its products, by late delivery, or by any other causes, regardless of advice or recommendations made by the Company or any of its agents or representatives.

Returns: All products returned to the Company for warranty evaluation must be authorized in advance by the issuance of a tracking number. The returned equipment must be clearly tagged with the name and address of the consignor, the purchase order number under which the product was purchased and the tracking number. Any products proven to the Company's satisfaction to be defective will be replaced or repaired at the Company's option. The Company will not pay for any transportation charges to or from its facilities.
